

TREADSTONE VALUE PROPOSITION

COMPANY SUMMARY

Treadstone Consulting is a communications systems integrator and technology/staffing provider that supplies technology and resources to keep companies connected with their employees, data and clients anytime, all the time, under any conditions, anywhere in the world. Treadstone was formed in June 2005 as an IT consulting firm. In 2007, the company branched out to develop TreadNet, a VSAT communications system that can be utilized anywhere in the world. In addition, Treadstone provides TreadForce, a unique staffing service and virtual pipeline of 300 systems integration professionals under contract to implement solutions in any environment. Treadstone Consulting has developed a reputation for “getting it done” while delivering robust scalable technology solutions.

ANYTIME ALL THE TIME UNDER ANY CONDITIONS ANYWHERE IN THE WORLD

KEY BENEFITS

- Vendor neutral – customizes solutions to the customer, not the brand
- Geographically diverse – implements solutions anywhere in the world and does not specifically focus on clients in only one region
- Staffing practice – 300 communications consultants under contract
- Package price – we don’t nickel and dime our customers from implementation through execution

TreadNet, Treadstone Consulting’s VSAT solution, connects companies from wherever they are in the world to their home headquarters with a secure and reliable network connection.

Treadstone uniquely offers TreadForce, a virtual pipeline of 300 systems integration professionals ready to be deployed anytime, anywhere, for any client need.
